Welcome, Our Aim at EvoDental is to Help You to ‘Be You Again’

Full jaw ‘same day smile’ dental implant treatment offers a long-lasting, natural-looking solution to wearing dentures, suffering with missing, loose, rotten teeth, or failing restorative dental work.

The EvoSolution™ is a unique ‘same day smile’ treatment. All our solutions involve the implants and full jaw fixed prosthesis being fitted on the same day as surgery to remove any teeth that need to be removed. Rather than individual implants replacing each tooth, our full jaw custom designed, bespoke dental prostheses consists of a one-piece bridge secured in place by four to six implants per jaw, enabling you to regain your healthy bite along with a natural looking smile and newfound confidence.

EvoDental specialise in solutions for patients requiring total tooth replacement. This may include people with no teeth at all, or that are missing several teeth and wearing dentures. It is also suitable for people who have advanced gum disease, loose teeth, or teeth that have been lost due to severe decay or wear.

Having only done this kind of treatment for many years, we have developed a range of solutions for our patients, taking into account the type and extent of their disease and their specific anatomy. This means that no matter how severe the case, we have a solution to suit every individual and we are fortunate that many dentists refer their most complicated cases to us for our help.

These services are provided on a private, non-nhs basis. We do not provide dental hygienist services.
